

On climate, the people agree. U.S. public opinion varies over a surprisingly narrow range

Author(s): Fischetti M

Abstract:

U.S. public opinion varies over a surprisingly narrow range. From what politicians and commentators say in the media, the U.S. would seem torn asunder over the matter of climate change. Not so, according to an assessment of 21 surveys encompassing almost 20,000 people in 46 states, which found ample agreement about global warming and what to do about it.

Resource Description

Communication: ☒

resource focus on research or methods on how to communicate or frame issues on climate change; surveys of attitudes, knowledge, beliefs about climate change

A focus of content

Communication Audience: ☒

audience to whom the resource is directed

Public

Exposure : ☒

weather or climate related pathway by which climate change affects health

Unspecified Exposure

Geographic Feature: ☒

resource focuses on specific type of geography

None or Unspecified

Geographic Location: ☒

resource focuses on specific location

United States

Health Impact: ☒

Climate Change and Human Health Literature Portal

specification of health effect or disease related to climate change exposure

Health Outcome Unspecified

Mitigation/Adaptation:

mitigation or adaptation strategy is a focus of resource

Adaptation

Resource Type:

format or standard characteristic of resource

Policy/Opinion

Timescale:

time period studied

Time Scale Unspecified
